The company founded in 1981 by the Florian Brothers is one of the most innovative and productive companies in the creation of BRUSHLESS digital technologies , the related total digital control systems and in the industrial production of applied mechanics. The manufacturing processes take place entirely in Italy in the Mogliano Veneto (Treviso) plants, all with great passion and determination thanks to the work of all Italian people who are highly trained in quality & product care.

Established in 1947 as family company in Monza, IBFM has been working for more than 70 years on the hardware market becoming one of the most important manufacturers in the gate accessories field. In this way, IBFM links its long experience in this sector with a strong research of new markets and quality products, fulfilling all the small but important customers' needs.

Since 1946 **OCM Industrial Doors** produces and exports high quality industrial doors all over the world. Our offices are located in Biella (Italy), as well as the entire production. Our strong presence on the market is the direct consequence of our experience and passion, values that allow us to meet your needs.

We have built up the satisfaction and taste of our customers with our long-standing, vast experience. Artent has a capacity to significantly respond to the needs of the industry with its cutting-edge machines and manufacturing equipment's in its 5000 m² indoor integrated facility in Istanbul

MFZ has been producing drives, controls, and sensors for commercial door systems in Legden in the Münsterland region since 1981. The mechanical engineering company Ovitor was founded even earlier in Helsinki in 1953. MFZOvitor is also part of the Marantec Company Group, a modern, networked organization. We combine mechanics, electronics, and connectivity to create new, intelligent, and individual drive systems.

Sipar, owned by Taboni's family, was founded in 1996. The company has offices in Italy on the Pian Camuno (Brescia) industrial estate where it has buildings with a surface area of more than 4,000 sqm. The company started production in both aluminium and steel roller shutter sections and developing its own aluminium door and window systems.
